

RAMJI SRIDARAN

LEAD SOFTWARE ENGINEER

JOB OBJECTIVE

Results-driven Technical Lead with expertise in **Java**, **Spring Boot**, **AWS**, and **microservices** architecture, experienced in designing and modernizing enterprise-grade applications and cloud integration platforms, including **Snowflake**, across multiple business domains.

CORE COMPETENCIES

- Java Enterprise Applications
- Spring Boot Microservices
- AWS Cloud Integration
- REST API Development
- Enterprise Application Modernization
- Cloud-Native Architecture
- Distributed Systems Engineering
- Enterprise Platform Development
- Data Integration Strategies
- Workflow Automation
- Scalable Backend Systems
- Technical Solution Design
- Agile Methodologies
- Technical Roadmapping

TECHNICAL SKILLS

Enterprise Application Development

Java, Spring Boot, REST APIs,
Microservices Architecture, SQL

Cloud & Integration Platforms

AWS Services, Snowflake, Vercel

Cloud-Native & Container Technologies

Kubernetes, Argo Workflows, Docker

Databases

PostgreSQL, MS SQL Server, Snowflake,
Hbase

Build, Version Control & DevOps

Maven, Git, GitHub, Bitbucket, Liquibase,
Jenkins

Monitoring & Logging

Datadog, Dynatrace, Splunk

PROFILE SUMMARY

- Results-driven Technical Lead with 12+ years of experience in designing, developing, and modernizing enterprise-grade Java applications across banking, advertising, and enterprise domains. Specialized in **Java**, **Spring Boot**, **AWS**, and **microservices** architecture, with strong expertise in **REST API** development, **cloud integration**, **workflow automation**, and **scalable distributed** systems.
- Hands-on experience in architecting **cloud-native** solutions, building scalable enterprise applications, and driving application modernization initiatives using modern software engineering practices including **Kubernetes** and **Argo workflows**. Strong background in **AWS-based** integrations, enterprise data platforms including **Snowflake**, and development of maintainable **microservices-based** systems aligned with business objectives.
- Experienced in driving **technical solution design**, **architectural decisions**, and implementation of **scalable enterprise** applications across distributed engineering environments.
- Prior exposure to **Kafka**, **Spark**, and **distributed data** processing ecosystems, with current focus centered on enterprise application engineering, **cloud technologies**, and **microservices-based** solutions. Also experienced in leveraging **AI-assisted** engineering workflows and **spec-driven** development approaches to improve development productivity and delivery efficiency.

WORK EXPERIENCE

Concentrix Catalyst Technologies Private Limited, Chennai | Jan'2026 to Jul'26 |
Senior Software Engineer

Dentsu Global Services, Coimbatore | Jun'2021 to Dec'25 | **Technical Lead**

Cognizant Technology Solutions, Coimbatore | May'2018 – May'2021 | **Associate**

TATA Consultancy Services, Kochi | Feb'2014 – May'2018 | **System Engineer**

Key Result Areas Across the Career

- Designed and developed enterprise-grade Java applications and microservices using Java, Spring Boot, and AWS
- Built RESTful APIs and integration services for scalable enterprise platforms and distributed systems
- Contributed to modernization of legacy applications using cloud-native and microservices-based architectures
- Developed AWS-based workflows and automation solutions for enterprise-scale processing and orchestration
- Worked on enterprise data integration platforms including Snowflake, supporting cloud synchronization and data workflows
- Designed scalable backend processing solutions leveraging Kafka and distributed processing frameworks
- Worked with Kubernetes and Argo Workflows for containerized deployments and workflow orchestration in cloud-native environments
- Automated deployment, validation, and workflow utilities using REST APIs, shell scripting, Jenkins, and cloud-native tooling
- Implemented database schema versioning and migration strategies using Liquibase
- Contributed to performance optimization, scalability improvements, and engineering workflow enhancements across enterprise applications
- Worked with AI-assisted engineering workflows and spec-driven development approaches to improve delivery efficiency

Messaging & Distributed Systems

Kafka, AWS SQS, MQTT

AI-Assisted Development & Modern Engineering Practices

Claude Code, Spec-Driven Development, OpenAI API, Groq API, Hugging Face APIs

Earlier Big Data Exposure

Spark, Sqoop, Solr, Distributed Data Processing, Mongo DB, REDIS

Limited Exposure / Working Knowledge

Python, Scala, JavaScript, Shell Scripting

Development Tools & Quality

SonarQube, Checkstyle, PMD, SpotBugs, JIRA

Operating Systems

Linux, macOS

EDUCATION

Bachelor in Information Technology

M.Kumarasamy College of Engineering, Karur, Tamil Nadu, India | **2013**

CERTIFICATIONS

SnowPro Associate – Platform

Certification | Jul'2025

Information Technology Infrastructure

Library (ITIL) | May'2015

Oracle Certified Professional – Java SE 6

Programmer | Nov'2013

PERSONAL DETAILS

Date of Birth: 15th February 1992

Languages Known: English, Tamil, Marathi

Address: 16 Maruti Homes, Neeli

Veerasamy Street, Triplicane,

Chennai - 600 005

- Contributed to solution architecture, system design, and implementation of scalable enterprise applications across cloud-native environments
- Earlier exposure to Spark, Sqoop, Solr, and distributed data processing ecosystems

Personal Project: AI-Powered Portfolio Chatbot | Nov'2025 – Present

- Architected and deployed a serverless AI-powered chatbot using Node.js and Vercel Edge Functions
- Integrated OpenAI and Groq APIs with automated failover strategies for resilient AI response workflows
- Designed RESTful APIs and cloud-native backend workflows for seamless portfolio integration
- Implemented logging, monitoring, CI/CD pipelines, and automated deployments using GitHub and Vercel
- Explored AI-assisted engineering workflows and spec-driven development approaches for rapid implementation and maintainability

Highlights

- Implemented automation workflows using Jenkins, AWS S3 utilities, and REST APIs to streamline deployment and operational processes
- Contributed to modernization of enterprise applications through cloud-native and microservices-based architectural approaches
- Worked on scalable backend processing and distributed system workflows using Kafka and related processing frameworks
- Developed reusable APIs and integration services for enterprise platforms and external systems
- Improved application reliability and maintainability through automated validation and testing utilities
- Implemented monitoring and observability solutions using Datadog and centralized logging practices
- Optimized search and data processing workflows across enterprise applications and distributed systems
- Worked on enterprise cloud integration platforms including AWS and Snowflake
- Contributed to workflow orchestration and containerized deployment approaches using Kubernetes and Argo Workflows
- Explored AI-assisted engineering workflows and spec-driven development approaches for improving engineering productivity
